

Katie Larson

320-828-1775 | katmae83@gmail.com | katielarson.net | GitHub: [KatieLars](https://github.com/KatieLars)

Full stack web developer guided by a passion for sharing user experience and knowledge. With experience in Ruby on Rails and JavaScript based programming (including React and Redux) as well as a background in art history, I became enamored with code's ability to build tools that address contemporary needs and expand human experience and potential. My strong skills in communication and problem-solving promote teamwork and drive project development.

TECHNICAL PROJECTS

Potluck Planner - [Github](#) | [Demo](#)

Plan a potluck, invite friends, and claim a dish to bring in this concise social media app.

- + React-Redux client-side server with Rails API managing Postgres (production) /SQLite (development) database
- + JWT authentication using the Rails Knock gem
- + Reactstrap library for full Bootstrap 4 integration

Cold Open - [GitHub](#) | [Demo](#)

The smart way to track what's in your freezer and when it expires.

- + Built with Ruby on Rails and Postgres utilizing RESTFUL routes and MVC architecture
- + Constructed front-end with jQuery and an internal Rails API to handle the Notes resource
- + Integrated login and signup functionality with OmniAuth strategies for Facebook and Google

Spice Rack - [Github](#) | [Demo](#)

See in a glance what spices are in your pantry and what you can do with them.

- + Implemented with Sinatra and Ruby with an MVC structure and Postgres database
- + Created user authentication with the bcrypt gem to control user logins
- + Employed ActiveRecord to generate database tables and establish relationships between models

TECHNICAL SKILLS

Ruby on Rails, HTML, CSS, JavaScript (including ES6), React, Redux, SQL, Postgres
